

Introducing ... **THE ALL NEW**

Made in the U.S.A.

SHADOW **X3** by Troy

**Speed...
Simplicity...
Performance...**

Is your detecting time in the field valuable to you? Would you like to increase the volume and quality of your finds? We created the Shadow X3 for those who want to maximize their results in the field and make every minute count! With its ultra-light weight, the X3 virtually eliminates fatigue, and allows you to spend more time at your favorite hunting site, without suffering "detector elbow" at the end of the day. The Shadow X3 offers true turn-on-and-go simplicity, and eliminates lengthy and confusing programming hassles, so you can begin hunting the instant you turn it on! The X3 is all about speed! Equipped with a 7-inch concentric coil, you'll notice that the pinpointing is so precise, you'll be recovering more targets faster than you ever have before. As a coin shooter, it's like having a coin vacuum cleaner in your hand. On the competition hunt field, you can swing the coil as fast as you like without the worry of missing a good target (over swing), and with its fast recovery, feather weight and precision pinpointing, you'll be "bringing home the gold" more often. The most powerful detector in its class, the X3 will stand up to most relic detectors, especially in iron-infested areas. Trashy sites are no longer a problem, and you'll spend less time doing the guesswork and more time recovering good targets with the superior trash separation abilities of the 7-inch coil. All this in an attractive, weatherproof package that runs on only one 9-volt battery, and is backed by a limited lifetime warranty. Once you experience the ultra-light weight, quality and performance of the Shadow X3, we're sure you'll be reaching for "old faithful" less and less!

The Shadow X3:
Designed, engineered and marketed by Troy Custom Detectors Inc. It is assembled and tested with Fisher Research Laboratory's traditional quality standards and is backed a Limited Lifetime Warranty.
