

## Supernova - Portable Appliance Tester

### ► The new Generation Supernova

When Seaward developed the new generation Supernova PAT tester, we talked to the people who are going to use it. You.

The result is a new PAT tester with capabilities beyond everyone's expectations.

New capabilities to help you do your job faster and more effectively.

- Multi voltage in/multi voltage out
- The best cost-benefit package
- Stores up to 2,400 memory locations including appliances and appliance history, by customer, location and site
- Accurate earthbond and leakage measurement even when multiple earth paths exist
- Full alpha-numeric QWERTY softkey pad
- Full graphics display
- Non volatile flash memory
- Real time clock
- Compatible with Seaward's PATs Plus and other leading software packages
- Connects to PC, Bar code reader and printer

### ► The most radical innovation in PAT Testing

Seaward Electronic is one of the longest-established and most respected names in the design and manufacture of Portable Appliance Testers. Our

track record in innovative and award-winning design has resulted in the definitive next-generation PAT tester: the Supernova.

- "Learn mode" software that adjusts the user-interface to differing levels of expertise
- Auto test code generation
- Boots up in less than 2 seconds
- Superfast download up to 10 times quicker than existing testers
- Next generation casing that is ergonomic and robust
- Downloads to the new Seaward PATSwin software package
- Parallel printer port

#### ▶ Multi Voltage in/Multi Voltage out

The new Supernova offers all the features you have come to expect from the industry's leading manufacturer. Research and development has produced radical new features which already outdate existing PAT models. The most exciting development is the ability to test 110 volt and 240 volt appliances from either 110 volt or 240 volt supply allowing you to test any appliance, with any supply, giving you absolute flexibility in your testing procedures.

#### ▶ With its in-built Help Software

Next generation industrial design delivers a large full graphics display for easy-read, on-the-spot information. Full help menus tell you as much or as little as you need to know, depending on experience level entered. A full alpha-numeric QWERTY keyboard features soft keys and 'fast keys' integrated with the LCD to provide instant test selection. Finally, flash memory puts an end to battery back-ups and means your test results are secure. The whole system packs into a complete ergonomic unit with no lids or panels, just integral lead storage and a flip-down keyboard. The new Supernova. It's everything you've ever wanted.

#### ▶ Reduced size. Increased Technology

The Supernova is the first PAT to incorporate the Seaward Super System, a new programme technology that simply works faster. Rapid boot-up is complete in less than two seconds, and an automatic real-time clock eliminates the need for date entry.

The new Super System also means that accurate earth bond and leakage measurements can be made when multiple earth paths exist. Testing appliances with filters is convenient and quick, thanks to multiple 250V/500V insulation testing.

Not only is the new Supernova fast, it's simple. New software adjusts one of the most versatile interfaces on the market to suit individual levels of expertise.

Your workload is hard enough. Supernova is designed to lighten it.

#### ▶ Reducing the load

Supernova PAT has increased data storage capacity to enable up to 2,400 memory locations with : full history and technical notes recorded by customer name, location and site, test codes recorded by appliance type and name. Supernova also has the facility for auto test code generation, auto or user-defined pass/fail settings and printer output for bar codes, test certificates and test reports.

Total control at your fingertips.

#### ▶ Supernova. Smarter Technology

As part of ongoing Supernova development, optional update disks will enhance the software to meet testing guidelines as they develop.

Combined with its Auto-calibration facility, Supernova will always be the most advanced system for PAT testing.

And the perfect way to advance your business.

## ▶ Accessories

Supernova is supplied complete with:

Earth Bond Test Lead

Flash Probe

230/110V Adaptor
