WHEN YOU CAN HIRE

Lee Vaughan Cable Identifier MKV

BOWDENS

The Lee Vaughan Cable Identifier MKV is a brand new instrument that is complimentary to the highly successful MKIV, which is still available, but the MKV offers new features that will make it easier to use, and quicker to identifier cables that might have presented a problem in the past.

NEW FEATURES:

- Selectable Power Output gives 4 times power compared with MKIV.
- Additional roving coil allows access to tightly bunched cables.
- Modulated (1.6KHz) or continuous tone option.
- Improved 'noise' suppression to minimise induced pick up in adjacent cables leading to easier detection of the 'lay' of the target cable.
- Powered by 4 x AA standard alkaline batteries - Battery status test.

OPERATION

The Lee Vaughan Cable Identifier MKV consists of a transmitter and receiver, earphones, connecting cable with clips, and a remote roving coil.

THE CABLE TO BE IDENTIFIED MUST BE UN-ENERGISED AND DISCHARGED..

TRANSMITTER – SET UP

Two cores of the cable at the remote end must be shorted together, and the transmitter connected to the same two cores at the supply end using the cable connectors supplied. When the Transmitter is turned on using the rotary selector switch, the first position performs a battery test. The battery condition is shown on the LED. Follow the instructions in the case but if in doubt, change the batteries.

TRANSMITTER – POWER OPTIONS

The operator can now select the power output and tone requirement to suit the cable length, and application. On short cable lengths, low power should be selected to minimise any noise induced in adjacent cables. Normal power is the equivalent to the output of the MKIV instrument. For long cables (10Km) maximum power should be used to give a clear signal at the point of identification. All of these power settings have a modulated signal at 1.6KHz frequency. The final position on the selector switch gives a continuous tone, but because of the increased demand on the battery, this option automatically selects the normal power option.

Although the battery life is improved by a factor of three when compared to the MKIV on the same power output, because the power output has increased by a factor of four times, when the MKV is used on maximum power or on continuous tone, the battery life will be very much shorter. Typically a new set of batteries will give 10 hours continuous use on either of these settings.

RECEIVER

At the point of Identification, the volume control can be set to maximise the signal reception,

the receiver being used in the traditional way, by holding it at right angles to the cable, traversing the cable up and down over a length of approximately 1 metre, and listening to the rise and fall of the signal due to the 'lay' effect of the cores which are twisted over each other. The effect can also be observed on the receiver meter.

If the target cable is tightly bunched with other cables in a trench, the remote roving coil can be used, by plugging the jack plug into the side of the receiver. This coil allows easy access around the cable.

For a positive identification of the target cable, the rise and fall must be experienced. Some induced pick up may appear in adjacent cables, but although detectable by the receiver, will not exhibit the rise and fall characteristics.

Following identification, when the headphones jack plug is removed, the receiver is automatically switched off. The transmitter must be turned off before storing back in the case.

INLEC, supporting you to deliver a world class service, every day, in every sector ...

OUR COMMITMENT TO YOU

A wealth of knowledge and experience.

You can take advantage of expert advice to ensure you get the best, most appropriate and cost effective equipment for the job. We supply a wide variety of industries, so if there is another way to do the job or save you time and money we'll pass on the benefit of our experience for free.

Honest advice, just a phone call away.

If we don't have a particular item, rather than hiring you something that won't do the job, we would rather direct you to an alternative supplier. You will always be provided with full instructions and if you still need help, call our technical team on Nationwide Low Call 0333 6000 600. Our aim is to save you time, frustration and money.

Top quality equipment from major manufacturers.

With Inlec you'll get the most accurate, reliable and well-maintained equipment available. Prices are regularly reviewed to ensure you always enjoy the best value for money. We have made a significant investment in test equipment so we ensure that it's well packed to minimise damage and delay.

We really do listen to you.

You won't waste your time contacting Inlec. Every request for equipment is logged and carefully considered. Listening to our customers helps keep our product range up to date and relevant. If you are unhappy about any aspect of our service please let us know so we can put it right.

YOUR 5 WAY GUARANTEE

1 GUARANTEE SAME DAY DESPATCH

We understand why prompt delivery is important to you. So, if we confirm your order before 3pm, you are guaranteed same day despatch.

2 OUR PRICE GUARANTEE

Inlec guarantee you real value for money. Our price match policy is simple - if you can hire the same product for less elsewhere, we guarantee to match that price and reduce it by a further 10% of the difference - and still deliver our industry leading technical and customer support.

For full details check our price-match guarantee online

3 TOP QUALITY GUARANTEED

All equipment is thoroughly checked prior to dispatch to ensure you receive it in full, safe working order. Your shipment will be securely packed and include manufacturer's instructions, accessories or consumables and a valid calibration certificate where appropriate. In addition, Inlec offer a 24 hour replacement service if you decide the equipment is not suitable for your application*.

4 FRIENDLY, KNOWLEDGEABLE ADVICE GUARANTEED

Inlec are happy to provide you with free advice, from an unbeatable team of experienced, knowledgeable and friendly engineers and hire experts.

5 YOUR GUARANTEE OF THE BEST CUSTOMER SERVICE

Throughout your hire we will work hard to ensure you enjoy the very best in support and service from Inlec. We guarantee you won't find better service anywhere in the industry.
