testo 845

Infrared Thermometer with Switchable Optics

This pyrometer offers what few others in the market can – switchable optics. With just a flip of a switch, you can shift between close focus and long distance temperature measurements with accuracy and ease. Use the 845 to measure points as close as 1/4 inch, then simply slide switch for measurements across the room. Whether close up or at a long distance, the 845 gives you exact readings in seconds plus it can also log the data points for analysis.

Relative Humidity Probe (optional)

testo 845 features:

- Pinpoint laser sighting
- Ambient air humidity measurements (optional) with audible alarm
- Record and store up to 90 readings for trending analysis
- Ultra fast scan capability (100 msec) to survey any area quickly and accurately (reference accuracy ± 0.75 °C)
- Display temperature, min/max values, alarm limits and emissivity simultaneously on bright, backlit, three line display
- Easily interface with PC via USB cable and data management software

Additional Features:

Transfer data to your PC in user selectable timed intervals for archiving, documenting and processing data in real time or online. Software, USB cable and tripod bracket are included with every instrument.

Transfer data to testo's IR printer for on-site documentation with date and time (printer optional).
