HVA34

Portable and universal VLF High Voltage Test Set

b2 electronic HVA34 is an ultra-compact and lightweight VLF Test set. The HVA34 also have the highest power to weight ratio of any comparable unit. Apart from their variable frequency VLF output, the operator can also select dual polarity DC and cable jacket or sheath testing output modes. It also features both electronic and mechanical discharging of devices under test (DDD®), a 12kV feedback protection system and an unlimited duty cycle (dry system – no oil used) completing the performance of this outstanding HV System. The HVA34 can be upgraded with a Tan Delta (TD) Diagnosis System and a Partial Discharge (PD) Diagnosis System (both optional).
