Pulled this ring from the surf line about 6 to 8" down with my Safari. Rang gold and it sure was. Great beach detector.

FBS®
World's Best Metal Detection Technologies

With a Safari, you can detect anywhere, anytime. Its FBS technology uses an extended range of multiple frequencies, along with Automatic Sensitivity and Ground Compensation. This enables you to detect in a wide range of ground types from parks to salt water beaches.

The high resolution notch discrimination scale, Target ID numbers and Tone IDs make it easy to identify targets and automatically reject junk. The Trash Density function improves performance in high trash areas where coins, artefacts and jewelry are close to unwanted targets.
