

Electronic phase comparator EPV

The **EPV electronic phase comparator** allows phase comparison at interfaces and measuring points. It can be used for the HR system as well as the LRM system. At the same time, it also allows checks for absence of voltage and tests on the interface.

Technical description:

- Integrated test leads
- Touch-safe testing
- Function test and battery check with integrated self-test
- Clear voltage indication by means of LEDs
- Active phase balance indication by two LEDs (green=phase balance; red=phase unbalance)
- Integrated safety function
- Interface control
- Manual or automatic shutdown of the device

Picture may vary.

Technical Data

Article no.		827 189 008 00005
Nominal frequency	f_N (Hz)	50...60
Scope of application		LRM
Adapter for HR-System		827 217 002
suitable bag		970 318 003
