

# INLEC™

## Datasheet

*Take your pipe inspection to a new level* with the Inlec TV Cam drain camera & VM-540 sonde locator kit. With this kit you are able to visually inspect your pipeline, detect issues and precisely pinpoint the problem areas.

While the pipe inspection is carried out, the camera head will send a signal that can be detected with the **Vivax Metrotech VM-540 Sonde Locator**. This makes it possible to detect the exact place where the camera head is and therefore locate the problem area precisely. The camera is also packed with a 40m cable and onboard 7.5 inch display to give a sharp & clear image that allows you to find and visualize the smallest issues within your area of inspection.

In addition, the kit has a keyboard allowing text to be stored on screen during the survey.

- Results are stored on included SD Card for easy retrieval.
- The camera is packed in a compact and rugged storage case with the locator

### Specifications

- Waterproof colour LCD
- USB slot for recording
- 14 bright white LEDs giving clear footage
- Dimensions: h.530mm w.440mm d.200mm
- Weight:10.6kg
- 23mm Camera Head
- Sonde integrated in camera head
