Hydrajaws Verify is our digital reporting system which allows on-site pull tests to be automatically recorded and compiled into a report using our **free Hydrajaws Verify Pro App** on a mobile device.

Report from on site

Job details can be set up before going on-site and used again and again to save valuable work time. When on-site a digital report is generated showing all the test data including a pass or fail result, a visual results graph, fixing details, site location co-ordinates, date and time. In addition, any notes and photos taken can be included within the report too. This can be easily emailed directly to your customer or securely stored for future retrieval.

Prove your test results

The app captures and records the digital report using an Evident Proof platform and saves it directly to the cloud. This platform ensures that when the real time data is collected it gets a 'proof seal' onto an unchangeable and un-hackable blockchain. This system mitigates the risk of someone tampering with the results by providing a fully auditable and transparent data provenance trail that is admissible in a court of law.

Find out more at:
www.hydrajaws.co.uk/verify

*The Verify PRO app is fully featured and free to use with no subscription fee required. Ideal for single users.

Upgrading to TEAMS allows an administrator to manage your testing by creating and editing clients, sites and tasks centrally, and assign remotely to your team of field testers.

Annual TEAMS subscription fee applies. Up to 3 users £300 then £125 per additional user up to 10 users. Above 10 users POA.
