Product Datasheet
ALF150 Duct Leakage Tester

Overview

The ALF150 is designed with three rapid change (push in – pull out) conical inlet nozzles designed to ISO5801:2007. The use of conical inlet nozzles makes the ALF150 a primary measuring device.

The ALF150+ is the high-end version of the ALF150. It features ambient temperature and barometric/absolute pressure sensors for real-time compensation giving improved accuracy when measuring flow rates. It also features a PID test pressure control mode with data logging, providing a fully automatic test facility for increased productivity.

Both the ALF150 and ALF150+ come with a single all in one instrument making this duct leakage tester is easy to use and configure through the intuitive menu driven user interface. The instrument is equipped with Bluetooth 2.0, SD Card, and USB Output. A Flexi-Hose with pre-connected machine coupling, duct adapter and static pressure tubing is included in the carry case so that the ALF150 is ready to use from the moment it is unpacked.

Product Features

- Portable & lightweight; Single person lift.
- Everything pre-connected and ready to use
- Rapid change Conical Inlet Nozzles.
- Easy to use single instrument with menu driven interface.
- SD card & USB Data output.
- Bluetooth 2.0 for Bluetooth enabled thermal printer.
- Configurable settings include:
 - Ambient conditions, sensor damping, units of measure, data record rate.
- Able to measure flow in STD conditions or Actual conditions.
- Four operating languages: English, French German & Spanish.
- Only return the electronic instrument for annual calibration.
- Entire unit can fit in boot of a small hatchback car.
- Maximum recommended SD card – 32GB SDHC Class 1

Applications

- Ductwork Leakage Testing
- Damper Leakage Testing
- Chilled Beam Testing
- AHU Leakage Testing
- Other End of Line Testing
- Testing after refurbishments
- Testing before/after duct cleaning
- Automatic back pressure compensated flow measurement for Fan testing.
